The first of these is the fact that the  
 number of cases of the disease has  
 increased in the last few years. This  
 is due to the fact that the disease  
 is more common in the tropics than  
 in the temperate zone. The second  
 fact is that the disease is more  
 common in the lower classes of  
 society than in the upper classes.  
 This is due to the fact that the  
 lower classes are more exposed to  
 the disease than the upper classes.  
 The third fact is that the disease  
 is more common in the summer  
 months than in the winter months.  
 This is due to the fact that the  
 disease is more common in the  
 warm months than in the cold  
 months. The fourth fact is that  
 the disease is more common in the  
 rural population than in the urban  
 population. This is due to the fact  
 that the rural population is more  
 exposed to the disease than the  
 urban population. The fifth fact  
 is that the disease is more common  
 in the children than in the adults.  
 This is due to the fact that the  
 children are more exposed to the  
 disease than the adults. The sixth  
 fact is that the disease is more  
 common in the males than in the  
 females. This is due to the fact that  
 the males are more exposed to the  
 disease than the females. The seventh  
 fact is that the disease is more
